

Roses!

At Joe's Greenhouse, we offer a dazzling selection of roses to give a catchy or classic look to any landscape. You'll find at Joe's a variety of colors, styles, and fragrances. Through Weeks Roses, a leading U.S. rose grower, we strive to bring you the very best in hardiness, disease resistance, and captivating color, such as the bold new lavender Wild Blue Yonder, while keeping classic favorites, like the deliciously perfumed pink and yellow Peace. We have a number of All-American Rose Selection Winners, including the highly disease resistant 2011 winner Dick Clark (*shown below*), an unusual swirl of cream and cherry that deepens into a beautiful burgundy.

Last year for our 60th anniversary, Joe's Greenhouse proudly announced the arrival of 24" tree roses! This exciting accent rose is perfect for those looking for a compact, upright shrub that produces lovely blooms throughout the summer. These elegant little trees provide both color and fragrance, and are easily winterized by wrapping the trunk with foam pipe insulation for winter protection.

Growing Tip: Ferti-Lome® Rose and Flower Food with Systemic Insecticide will both eliminate pests and give you a lush, healthy plant.

For more information and a list of rose varieties available at Joe's Greenhouse visit <http://joesgreenhouse.com/rose.htm>

Our classic miniature roses are now in 6" containers- perfect for gifts!

Happy 90th
Birthday Joe!

Mulch and Garden Preparation

Beautiful summer and fall harvests begin now with correct soil preparation, and organic matter is the key to rich, fruitful soil. Incorporation of organic matter provides nutrients and nutrient holding capacity, air space, and good water drainage.

Here at Joe's Greenhouse, we have a wide selection for all your soil amendment and mulching needs, including peat moss, soil pep, Nutri-Mulch and other composts, coconut fiber (coir), perlite, and vermiculite. Available top mulches include shredded bark, bark nuggets, lava rock, and coconut mulch.

We also have square foot garden boxes, with Joe's Special Blend potting mix available in 4 gal., 16 gal., or call ahead for 1 cubic yard volume. Now is the time to mulch!

Employee Spotlight

Joe's Greenhouse welcomes Jabe Huber as a full-time employee. Jabe recently graduated magna cum laude with a BS in Horticulture from Utah State University. Jabe is a Utah Certified Nursery Professional and is excited to continue his career with Joe's Greenhouse.
